PROFESSIONAL SUMMARY

Web Developer and Software Engineer with 1+ years of experience building and maintaining web pages and user interfaces using HTML5, CSS3, JavaScript, and PHP. Skilled in responsive design, cross-browser compatibility, and quality checks for layout, usability, and performance. Experienced in collaborating with marketing and business teams to deliver accurate work within tight timelines. Strong foundation in Python, SQL/MySQL, and problem solving.

TECHNICAL SKILLS

Web Development: HTML5, CSS3, JavaScript, PHP, Responsive Web Design, Cross-Browser Compatibility, Semantic Markup, UI Development
Programming & Data: Python, SQL, MySQL, Object-Oriented Programming, Data Structures, Database Design
Quality & Testing: Quality Assurance, Layout and Usability Testing, Troubleshooting, Performance Monitoring, Reporting
AI & Computer Vision: Deep Learning, Computer Vision.
Tools: Git, GitHub
Professional: Cross-functional Collaboration, Communication, Attention to Detail, Time Management, Quick Learning

PROFESSIONAL EXPERIENCE

Software Engineer **Sep 2025 – Oct 2026**
Vsplash Techlabs, Remote, India | *Full-time*
Technologies: HTML, CSS, JavaScript, PHP, MySQL, Git

- Developed and delivered multiple web projects from implementation through quality checks, troubleshooting, and final delivery within short timelines.
- Performed detailed QA checks to identify and fix functional, cross-browser compatibility, performance, layout, and usability issues before delivery.
- Integrated and configured software tools and third-party components to implement required functionality.
- Collaborated with internal teams and stakeholders to clarify requirements, resolve technical issues, incorporate feedback, and meet delivery deadlines.
- Applied systematic problem-solving and attention to detail to improve quality and ensure accurate project completion.

Software Engineer / Frontend Developer (Freelance) **Feb 2024 – Sep 2025**
Samaarav Technologies, Remote, India
Technologies: HTML, CSS, JavaScript, PHP, MySQL.

- Developed and maintained client web projects based on functional and business requirements using HTML, CSS, and JavaScript.
- Customized web page components and user interfaces, ensuring responsive layouts and reliable functionality across devices and browsers.
- Collaborated with marketing and business teams to improve web page performance and user experience.
- Managed content and code updates, issue resolution, and requirement changes while delivering projects on time.

PROJECT

Local-First E-commerce Order Data Pipeline | GitHub
Technologies: Python

- Built an end-to-end Python data pipeline that ingests e-commerce order CSVs into raw, validated, curated, and quarantine zones, with a unique run ID and metrics logged for every run.
- Implemented schema and business-rule validation, quarantining invalid records with rejection reasons and flagging late-arriving data into the correct date partition.
- Deduplicated order line items on (order_id, product_id) and wrote date-partitioned output, keeping the latest record for each key.
- Made re-runs idempotent using a content-hash manifest, so duplicate files are skipped and failed runs can be replayed safely. Added automated tests for happy-path and edge cases.

EDUCATION

Master of Computer Applications (MCA) **2023 – 2025**
Vivekananda PG College, Hyderabad | GPA: 8.23

Bachelor of Science (Computer Science) **2020 – 2023**
St Pious X Degree and PG College for Women, Hyderabad | GPA: 8.63

CERTIFICATIONS

JavaScript Essentials – Cisco | Python Essentials – Cisco | Data Analytics Essentials – Cisco
